EDITION: OCTOBER 17, 2016

Index. (2) For the day-

directly by a board or by contracted labor. (3) Contractors, design-build firms, contract management entities, program management entities, or any other person under contract to construct facilities or major additions to facilities may use any construction techniques allowed by contract and not prohibited by law, including, but not limited to, those techniques known as fast-track construction scheduling, use of components, and systems building process. (4) Except as otherwise provided in this section and s. 481.229, the services of a registered architect must be used for the development of plans for the erection, enlargement, or alteration of any educational facility. The services of a registered architect are not required for a minor renovation project for which the construction cost is less than \$50,000 or for the placement or hookup of relocatable educational facilities that conform with standards adopted under s. 1013.37. However, boards must provide compliance with building code requirements and ensure that these structures are adequately anchored for wind resistance as required by law. A district school board shall reuse existing construction documents or design criteria -vear educational facilities work plan includes the

construction of two or more new schools for students in the same grade group and program, such as elementary, middle, or high school, the district school board shall require that prototype design and construction be used for the construction of these schools.
