DISSERTATION ABSTRACT

This, or Something like It: Socrates and the Problem of Authority

Major Professor: Joanne Waugh

Co-Major Professor: Joshua Rayman

Committee Members: Mor Segev | Michael Morris

I argue that authority, conceptually and in practice, constitutes a serious problem for Socrates. On my reading, the problems of authority are indicative of an improper understanding of the soul and the ailing condition of the sociopolitical practices of Athenian culture. I investigate Plato's characterization of the Socratic practice of philosophy and attempt to develop an interpretive strategy of Plato's work that commits us to neither wholly dogmatic nor wholly skeptical readings. I maintain that Plato's Socrates is reluctant to commit to doctrine, and critical of the doctrinal commitment of others, because he sees in such eristic (non-dialectical) postures the threat of aporia. I maintain that Socrates' antiauthoritarian characterization is evidence of his dedication to the continued pursuit of wisdom. While I develop a picture of an antiauthoritarian Socrates within the nonauthoritative genre of Plato's dialogues, I hope to retain the view that the Socratic pursuit of wisdom is aspirational. In my reading I give special attention to the historical context in which Plato writes, and this includes the choices Plato makes in presenting the character of Socrates.
