

PERSONNEL ENTERING ANIMAL FACILITIES HEALTH AND RISK ASSESSMENT

Complete, affix signatures and return signed form to IACUC via email at IACUC@usf.edu or hard copies can be mailed to MDC 35

Copies of publications referred to in this form are available on the Web at <http://www.research.usf.edu/dric/iacuc>

1. Occupational health and safety principles require that individuals know the hazards associated with their work, understand how these hazards are controlled, have safe practices, and use protective supplies and equipment.

2. The Public Health Service Policy on Humane Care and Use of Laboratory Animals requires institutions to provide occupational health-c637.18 T n BT /F1 9 • ç ñ v`d. This should be a collaborative assessment of risk in which the

individual, supervisor, facility manager, veterinarian, safety officer and occupational health professional may participate as appropriate.

5. As a way of initiating and documenting this assessment, each individual that may access animal facilities must complete this health and risk assessment document .

2. CLINICAL CONDITION.

Working in animal facilities may exacerbate certain health conditions. If you have health conditions such as, but not limited to, a personal or family history of allergy (e.g., seasonal rhinitis, hay fever, eczema, or hives), asthma symptoms (e.g., coughing, wheezing, chest tightness, or shortness of breath), chronic skin condition or irritation, spina bifida, tuberculosis, diabetes, epilepsy, immunodeficiencies, or medications which compromise immunocompetence, you may wish to seek the advice of a physician before working in animal facilities.

Employee Healthcare Contacts:

- USF ±Personal physician.
- Moffitt employees contact Occupational Health Department at 745-4276 email: marilyn.thompson@moffitt.org
- VAH employees contact Employee Health floor 6N room #650, (813) 972-2000

3. THINGS TO KNOW:

- The most common health hazard in animal facilities is allergies.
- If your duties require entry to an animal room, you must first contact the facility manager.
-

4. CERTIFICATION.

- I understand the most common health hazard in animal facilities is allergies and I will contact the facility manager before entering an animal room.
- I understand that I may seek advice of a physician/health care professional to discuss any health conditions that may affect my ability to perform my duties before working in animal facilities.

- x I understand that a USF **Supervisors Accident Investigation Report** must be completed after all work-related accidents, injuries, or suspected hazard exposures which involve animals, or which occur in animal facilities.
- x I understand that recommendations can be made regarding this health & safety program c/o Research Integrity & Compliance at 974-7106.
- x I assure that this description is complete and accurate.
